

PARTICLE SCIENCES
DRUG DEVELOPMENT SERVICES

You're Invited!

**Join Us for an Open House at Particle Sciences
Co-Sponsored by HORIBA Scientific and Microfluidics**

**Leaders in Particulate and Solid Solution
Drug Development and Regulatory CMC Support**

May 18th, 2011 • 10:00 a.m. - 4:00 p.m.

3894 Courtney Street, Courtney 1, Suite 180, Bethlehem, PA • 610.861.4701

Particle Sciences is the leading particulate based drug development CRO with extensive in-house capabilities and a track record of success with some of the world's largest pharmaceutical and biotech companies. With the establishment of our new cleanroom dedicated to manufacturing highly potent compounds to support clinical trials, we are having an Open House on May 18th.

Developing a successful drug product takes expertise across multiple disciplines. HORIBA is the premier instrument manufacturer of particulate and solid state characterization tools. Microfluidics high-shear processors are widely recognized as a preferred path to nano-particles. All three Companies will be available with live demonstrations plus senior technical staff will be present to discuss your specific project. Private rooms will also be available for confidential discussions.

Executive representatives from Pennsylvania BIO and Ben Franklin Technology Partners will also be participating. Refreshments and lunch will be served. There will be drawings for two Apple® iPad® mobile digital devices, one at 11:00 a.m. and one at 2:30 p.m. The winner must be present to win.

Please RSVP at www.particlesciences.com or should you require an appointment with any of the experts present, contact mcochran@particlesciences.com
