

## Transport case for PG-300 series

### PG-350E carrying case

The HORIBA PG-300 series are portable instruments. To protect them during all transport, HORIBA designed a specific transport case to keep accuracy on the field.

Equipped with a double foam inside, chocks from transport are absorbed in the best way to protect your instrumentation. A special part of the case is reserved for other accessories like cables and is separate from the instrument part.

CE marking compliant
